

Jersey City Medical Office Building - Surgem, LLC

Jersey City, NJ

Project Components:

Base Building Core and Shell Design

First Floor Urology Specialty Care Suites - LinAcc, HDR, CT - Diagnostic and Treatment facilities.

Second Floor - Medical Offices, Infusion and Pharmacy with Compounding

Third Floor - Surgical Suites

Consulting MEP/FP Engineer:

Luongo Associates, P.A.

Project Highlights:

We provided the complete phased designs for this project including the new ground up 31,000 gross sqft 3 story base building and all tenant fit-out spaces. All of the medical technology in the building represented, at the time, the State of the Art and required comprehensive support infrastructure.

Completion Date:

The building has been fully occupied since 2011.
